SUMMARY

Enthusiastic MCA student with a solid foundation in Python, and web development. Driven by curiosity and a passion for building meaningful software solutions. Looking to join a dynamic team where I can grow, contribute to real-world projects, and keep learning in a fast-paced environment

SKILLS

Programming Language :- Java, Python

Web Development :- HTML, CSS, JavaScript, React Js

Database :- Mysql, MongoDB Basics

Soft Skills :- Analytical, Collaborative, Articulate, Flexible

PROJECTS

Event Management, Frontend-HTML,CSS

Aug 2023

- Designed a web-based platform allowing users to view available events, check pricing for specific events, and contact the team for inquiries, using HTML, CSS, and JavaScript.

Blood Bank And Donor Management System

Jan 2024

- Developed a blood donation management system enabling admins to view and update blood group availability by location, and allow users to book donation slots at nearby hospitals. Built using PHP, HTML, CSS, JavaScript, MySQL, and XAMPP Server.

Amazon Clone Web

- Replicated the core functionality and design of Amazon.com through a custom-built web application, featuring user authentication, login verification, and dynamic shopping sections. Developed using HTML, CSS, JavaScript, and XAMPP Server.

ACADEMIC ACHIEVEMENTS & CERTIFICATIONS

- **Certified in Python and Data Visualization – Surana College (Autonomous)**
- **Certified in Python-Full stack Development Internship – Edu skills (AICTE)**
- **Certified in DBMS with MySQL Workbench – Surana College (Autonomous)**
- **Received participation certificate ReactJS – Surana College (Autonomous)**
